SPRINGO BINGO

Spring is a great time to sow wildflower seeds – but when exactly IS Spring?
Tick off each of these signs to be sure*.

Dawn chorus		Birds making nests	Bumblebees out of hibernation
	Spring flowers blooming	Hayfever	
Warmer soil (you can put your bare bottom on it!)	Blossom appearing on trees		Days getting longer

*If there is a patch of warmer weather early on and your seeds start to grow, a late frost could kill the seedlings. So don't be lured in!
